

UNI OF SALFORD

FREE SUMMER SCHOOLS

Are you a Y12 student who has an interest in either Biosciences or Engineering and are currently studying L3 qualifications in college. Then choose one of these:

IGNITION

24TH – 26TH JUNE

Ready to see if Engineering or Design is your actual calling?

The Mission ... team up to engineer a custom remote-controlled race car from scratch.

Put your build to the ultimate test in our high-stakes championship races on the final day.

Think: Less "sitting in a lecture," more "running a pit crew."

It's the fastest way to build your CV (and a literal race car) before UCAS applications kick off.

ARE YOU IN?

BREAKING THE MOULD

22ND- 24TH JULY

If you want to know what a Bio degree actually feels like, step out of the classroom and into the lab.

Get hands-on with high-spec equipment you won't find in a school prep room.

Conduct your own experiments - no "pre-packaged" results here.

It's a week of being a scientist, not just a student. Perfect for your Personal Statement and even better for seeing if the lab life is for you.

READY TO BREAK THE MOULD?
